

Tuesday 2nd June 2020

Good Morning Year 2s!! We hope you are enjoying this beautiful weather!

Literacy

In Literacy, we've been learning the poem 'The Owl and the Pussy-Cat'. You can listen to the poem here: https://www.youtube.com/watch?v=Cpi_jT2QMMs

Today we're going to continue to learn this whole poem off by heart. We've made a talk for writing map to help you but we've taken away the words. Can you remember the poem?

Writing

Yesterday you used your plan to help to retell the narrative of the Owl and the Pussy-cat.

Success Criteria:

  I can pretend to be the owl or the Pussy-cat

    I can write in first person using I

   I can use my plan to retell the journey

   I can use expanded noun phrases

Today can you add to your writing to make it even better!

Check for words that don't look right and have another go at spelling them! Have you included capital letters and full stops?

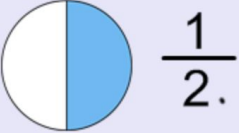

Can you add in some more description and exciting language to make your writing even more interesting to read?

Maths

Today we are going to be reminding ourselves about fractions. Fractions are parts of a whole. Use these keywords to help remind yourself of some fractions.

Key words:

fraction 

half  $\frac{1}{2}$

quarter  $\frac{1}{4}$

third  $\frac{1}{3}$

Using playdough, clay or paper (like we did in school) can you make different fractions?

Can you split your object into halves?

Can you split your object into quarters?

Can you split your object into thirds?

What other fractions can you make?

Remember fractions are **always equal!**

Music

Today watch this video to see Yolanda Brown show how to create a jar xylophone using glass jars, food colouring, a wooden spoon and water.

<https://www.bbc.co.uk/teach/bring-the-noise/found-sounds/z4rcbdlm>

A xylophone is a tuned percussion instrument. The notes are made from a set of wooden blocks. The longer the block of wood the lower the note.

A jam jar xylophone uses a set of jars with water in them instead of wooden blocks to make different notes.

When you tap a jar with the spoon it vibrates, making that clinking sound. The faster something vibrates, the higher the **pitch** of the sound it makes. Adding water to the jar makes the jar vibrate more slowly, lowering the pitch of the sound.
