How do we find  $\frac{1}{4}$  of these counters?

Top tip - when finding a fraction of an amount...  
Divide by the denominator (bottom number) and multiply by  
the numerator (top number)

There are 16 counters.

We want to split them into 4  
groups (quarters) as the  
denominator is 4.

16 divided by 4 is 4.

We only want 1 of those  
groups (quarters) as the  
numerator is 1.

$$1 \times 4 = 4$$

One quarter of the counters is  
4

$$16 \div 4 = 4$$

$$4 \times 1 = 4$$

On the next slide, read through the descriptions of two characters. Imagine what they look like in your head. What words in the text help you to picture them?

Draw each character including as much detail as you can. Label the pictures with words and description from the text.

## Character 1

The small girl was wearing a silver dress with shiny shoes to match and her hair was whipped up into the shape and texture of a pinecone. She wore rouge on her cheeks and solid gold bangles around her wrists. Her mouth was small and pinched, while her almond-shaped brown eyes were sharp and bright.

## Character 2

He was ancient – he looked at least a hundred and fifty years old. His scalp, face and neck were greyish green and scaly, his huge eyes looked out from above creased bags of skin and his nose was wide and flat. His grey hair hung curtain-like down to his chest, while the top of his head was wrinkled and as bald as a nut. He wore a long, flowing olive-green robe and green pointed cloth shoes. His neck was stooped so that his hunched shoulders were at the same level as his ears, and covering the whole of his back was a giant shiny tortoiseshell. Believe me, I am a healer, an energy man.
