# Maths

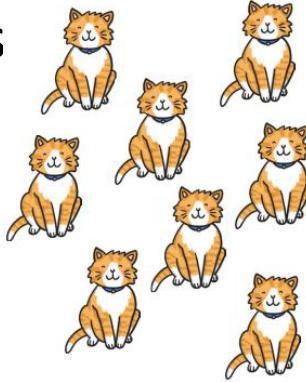

**Shape hunt: Find as many of these shapes in your house as you can...**

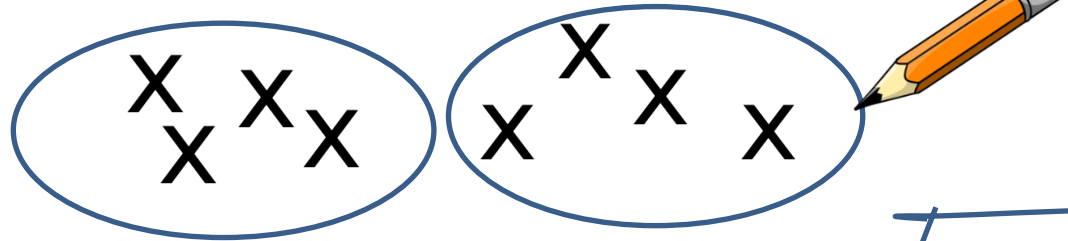

# How to find half of objects...

1) First count the objects

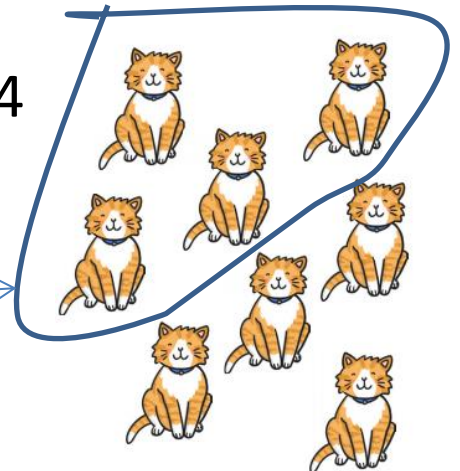

2) Next draw two circles. Draw an x in each circle. You keep going until you reach the number of objects. In this case 8.

3) Then count the crosses from one of the groups....4

4) Finally draw a circle around the correct number of objects.

Have a go at finding half of these objects...
